

# Reflections

center for skin & body

299 East Northfield Road, Livingston, NJ 07039-4811 • 973.740.2444

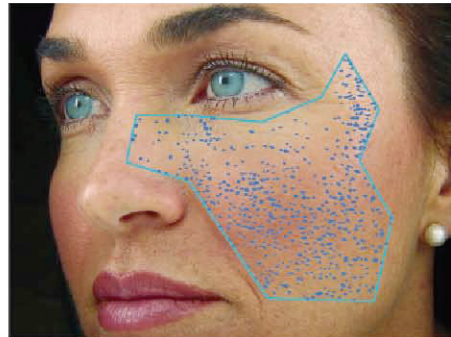

Mitchell Chasin, M.D.  
MEDICAL DIRECTOR, REFLECTIONS

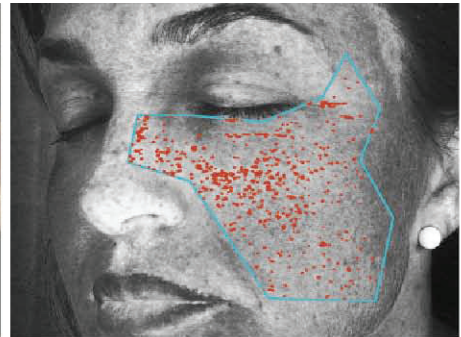

Session: 7/12/2005

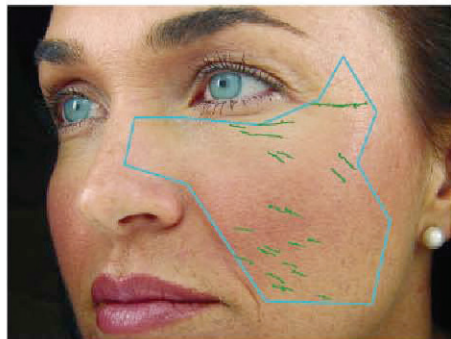

Spots (64%)

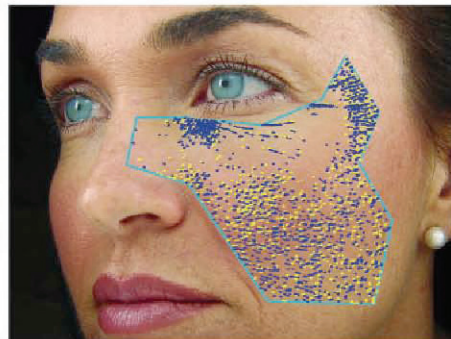

Pores (27%)

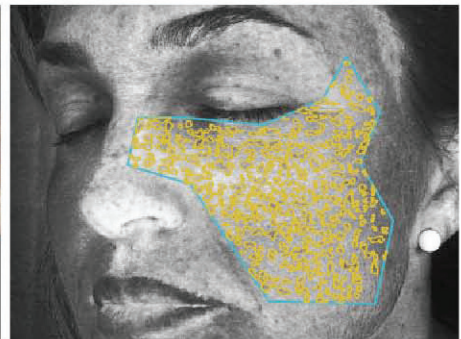

Porphyrins (399)

Wrinkles (8%)

Evenness (1%)

UV Spots (195)

Percentile scores for evenness, wrinkles, spots and pores depict your ranking relative to others of the same age, gender and skin type (higher scores are better). The scores for UV spots and porphyrins represent the number of individual skin features detected (lower scores are better).

### Personalized recommendations are provided based on a detailed history, examination and the results of VISIA Imaging

- We can treat facial redness and sun spots with the *Starlux Intense Pulsed Light Device (IPL)*.
- Spider veins and broken capillaries can be treated with the *Vbeam Pulsed Dye Laser*.
- We can treat acne scars and wrinkles, and also reduce pore size with the *Fraxel Laser*.
- We can provide fast, comfortable and effective hair removal with the *Gentlelase* and *GentleYag Lasers*.
- Melasma can be treated with the *Fraxel Laser*.
- We can tighten the skin with the *GentleYag NdYag Laser*.
- We can provide long term acne reduction with the *Smoothbeam Laser* and *Photodynamic Therapy ALA*.
- *Botox Cosmetic* can be used to treat the deep wrinkles between the eyebrows caused by facial expression.
- *Restylane* can be used to fill the creases of the Nasolabial folds and enhance the lips.
- *Microdermabrasion* can be used to refine the surface of the skin, as can topical skin care agents.
