

## The Procedure

The *Face by Thermage* procedure is non-invasive and usually takes around an hour depending on the area being treated. A handpiece with a smooth, flat tip delivers radiofrequency energy, which safely heats the layers of your skin. You'll be asked for your feedback on the level of heat sensation experienced during the procedure to help balance your comfort with maximum results.

## Results with A Single Treatment

The procedure generally requires only one treatment in a doctor's office and you can quickly get back to your normal routine.

Results vary from subtle to dramatic. Generally, improvements are immediately visible and continue for up to six months. Results are long lasting depending on your skin condition and the aging process.

## Ask How You Can Turn Back the Clock with Thermage

Don't wait. Ask your doctor to show you how fast and easy it is to get back the you, you used to know – without surgery, injections and little to no downtime.

Ask your physician  
about other procedures  
for a naturally younger  
looking face:

### *Eyes by Thermage™*

for smoother, tighter skin, decreased wrinkles  
and hooding in the eye area

### *Lips by Thermage™*

for smoother, tighter skin around the mouth and  
naturally fuller, more defined lips

Both without surgery, injections and little to no downtime.

## Smoother, Tighter, Younger Looking Face.

### Get Back the You, You Used To Know

If you find that you no longer look as young as you feel, there's a way to turn back the clock. With the *Face by Thermage*™ procedure, you can have a naturally younger looking appearance without surgery, injections and little to no downtime.

- **Smoother and tighter skin.** Thermage stimulates and renews your own collagen, improving the texture, and reducing the sagging of your skin.
- **Contouring along the jaw line under the chin.** Thermage affects deep beneath the skin surface, redefining your jawline and reducing the turkey neck.
- **Softening of wrinkles around the mouth, eyes, and forehead.** Many patients report an overall improvement of fine lines and wrinkles.

As you age, the collagen in your skin breaks down resulting in wrinkles and sagging skin. *Face by Thermage* uses patented, FDA cleared technology that delivers heat deep into the skin to rejuvenate existing collagen and stimulate new collagen growth. The result: skin that looks and feels noticeably smoother and tighter.

Individual results vary.  
Side effects are generally mild and may include redness, swelling, blisters, bumps and rare instances of surface irregularities.

*"I was thrilled. My skin was smoother. My laugh lines were less visible and my jaw line had better definition. I couldn't put the mirror down."*

— Jane, age 50, California
